SETUP

- 1 Spread the 14 **Number Cards** on the table so everyone can see them.

- 2 Place the stack of 13 Clue cards where everyone can reach them.

- 3 Place the **Answers card** to the side of the table: You won't need it until the very end of the game.

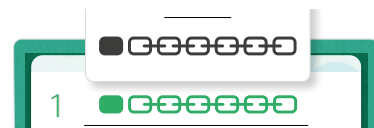

- 4 Play Level 1 first.

HOW TO PLAY

- Take turns drawing a **Clue card** and reading the Level 1 clue **aloud**. Together, try to find the number **that matches the clue**.
- When you think you have found the right number, place the Clue card on the Number card. Throughout the game, you are welcome to move the Clue cards if you want to change your answers.
- If you have no idea which number links to the clue, set the card aside, and return to it later.

END OF THE GAME

- When all of the **Clue cards** are on **Number cards** and you are satisfied with your choices, take the remaining Number card. **Compare its code** with the code for your difficulty level on the Answers card.

- If **both cards have the same code**, you have won this level! You are now ready to take on the next difficulty level!
